

MC

# Matthew Carpenter

## Professional Summary

"I help people achieve their goals through technology."

- Software Engineer and Apple certified systems-technician with a focus on the end user experience. It is my passion to bring projects to life using technology. Certification in Full Stack Developer and proficient with: API's, JavaScript, C#, Content Delivery Networks, Node.js, React and Git. Successfully trained and deployed multiple technician teams, and held a market wide trainer position with a focus on both adult learning and interpreting data analytics. My experiences have provided me the opportunity to put into practice; triaging techniques, problem solving, and learning on the fly all while amplifying my soft skills. It is my mission to contribute to a team that develops the world's most cutting edge software.

## Work History

Madden Media - Front End Web Developer  
Tucson, AZ

09/2019 - Current

At Madden Media we dedicate ourselves to providing industry leading designs for all destination marketing needs. In this role I am exposed to all levels of design/development/ and deployment processes. Day to day needs require fluency in the LAMP stack, javascript and javascript libraries as well as Agile methodologies. It is my pleasure to create eye catching and functional digitally designed web applications across various platforms, including mobile, to strengthen company brand and identity with style.

Apple - Genius  
Tucson, AZ

04/2011 - 10/2019

As an Apple genius I was The highest tier technical support advisor for consumer facing technology. In this highly visible customer facing position I would evaluate isolate and resolve some of the most challenging software and hardware needs with style and composure.

Additionally my skills provided me the opportunity to participate in WWDC events, train technicians and engineers market wide and even worked directly with the Apple Maps and Siri engineering team on special projects.
